

目 錄

中文摘要.....	
英文摘要.....	
第一章 緒 言	1
第二章 總 論	3
第一節 補益劑之文獻考察.....	3
一、 六味地黃丸之方劑學文獻考察.....	3
二、 補中益氣湯之方劑學文獻考察.....	9
三、 知柏八味丸之方劑學文獻考察.....	15
四、 歸脾湯之方劑學文獻考察.....	20
第二節 糖尿病與學習記憶的相互關係.....	27
一、 糖尿病分類及病因.....	27
二、 學習與記憶的基本過程.....	27
三、 糖尿病與學習記憶關係.....	28
第三章 實驗材料與方法	30
第一節 實驗材料.....	30
一、 補益劑萃取過程	30
二、 實驗試劑	32
三、 實驗動物	33
四、 實驗儀器	33
第二節 實驗方法.....	35
一、 高血糖鼠之誘導	35
二、 標準口服葡萄糖耐受性測試.....	35
三、 Morris 水迷宮實驗.....	38

第三節	單胺濃度 (Monoamine) 測試.....	40
第四節	數據統計.....	41
第四章	實驗結果	42
一、	標準口服葡糖耐受性測試.....	43
二、	水迷宮學習記憶測試.....	52
三、	單胺濃度測試	72
第五章	討論.....	82
參考文獻	89

圖目錄

Fig. 1 水迷宫電腦劃分圖	33
Fig. 2 Plasma glucose(mg/dl)and insulin(ng/ml)levels of LWW and in standard oral glucose tolerance test.	44
Fig. 3 Plasma glucose(mg/dl)and insulin(ng/ml) levels of PCT and in standard oral glucose tolerance test.	45
Fig. 4 Plasma glucose(mg/dl)and insulin(ng/ml) levels of JPW and in standard oral glucose tolerance test.	46
Fig. 5 Plasma glucose(mg/dl)and insulin(ng/ml) levels of GPT and in standard oral glucose tolerance test.	47
Fig. 6 Preventive and therapeutic effects of LWW on plasma glucose (mg/dl) and insluin (ng/ml) levels in glucose tolence test in STZ induced diabetes rats.....	48
Fig. 7 Preventive and therapeutic effects of PCT on plasma glucose (mg/dl) and insluin (ng/ml) levels in glucose tolence test in STZ induced diabetes rats.....	49
Fig. 8 Preventive and therapeutic effects of JPW on plasma glucose (mg/dl) and insluin (ng/ml) levels in glucose tolence test in STZ induced diabetes rats.....	50
Fig. 9 Preventive and therapeutic effects of GPT on plasma glucose (mg/dl) and insluin (ng/ml) levels in glucose tolence test in STZ induced diabetes rats.....	51
Fig.10 Effects of LWW on total swimming time and path length of STZ induced diabetes rats on the hidden platform of water maze.	53

Fig.11 Effects of PCT on total swimming time and path length of STZ induced diabetes rats on the hidden platform of water maze.	54
Fig.12 Effects of JPW on total swimming time and path length of STZ induced diabetes rats on the hidden platform of water maze.	55
Fig.13 Effects of GPT on total swimming time and path length of STZ induced diabetes rats on the hidden platform of water maze.	56
Fig.14 Total swimming time and path length of control, STZ and LWW (prevent and cure) groups which swum through the target ring in the third day.	58
Fig.15 Total swimming time and path length of control, STZ and PCT (prevent and cure) groups which swum through the target ring in the third day.	59
Fig.16 Total swimming time and path length of control, STZ and JPW (prevent and cure) groups which swum through the target ring in the third day.).....	60
Fig.17 Total swimming time and path length of control, STZ and GPT (prevent and cure) groups which swum through the target ring in the third day.	61
Fig.18 Swimming time and path length of control, STZ and LWW (prevent and cure) groups that swum to the hidden platform during reacquisition and retrieval of water maze.	63
Fig.19 Swimming time and path length of control, STZ and PCT (prevent and cure) groups that swum to the hidden platform during reacquisition and retrieval of water maze.	64

Fig.20	Swimming time and path length of control, STZ and JPW (prevent and cure) groups that swum to the hidden platform during reacquisition and retrieval of water maze.....	65
Fig.21	Swimming time and path length of control, STZ and GPT (prevent and cure) groups that swum to the hidden platform during reacquisition and retrieval of water maze.....	66
Fig.22	Time and distance of control, STZ, LWW (prevent and cure) groups which swum to the visible platform, and their swimming speed.....	68
Fig.23	Time and distance of control, STZ, PCT (prevent and cure) groups which swum to the visible platform, and their swimming speed	69
Fig.24	Time and distance of control, STZ, JPW (prevent and cure) groups which swum to the visible platform, and their swimming speed.....	70
Fig.25	Time and distance of control, STZ, GPT (prevent and cure) groups which swum to the visible platform, and their swimming speed.....	71
Fig.26	Concentration of monoamine (VMA, NE, DA, DOPAC, 5-HT, 5-HIAA) of LWW, STZ and control groups in cortex	73
Fig.27	Concentration of monoamine (VMA, NE, DA, DOPAC, 5-HT, 5-HIAA) of PCT, STZ and control groups in cortex.	74
Fig.28	Concentration of monoamine (VMA, NE, DA, DOPAC, 5-HT, 5-HIAA) of JPW, STZ and control groups in cortex.	75
Fig.29	Concentration of monoamine (VMA, NE, DA, DOPAC, 5-HT, 5-HIAA) of GPT, STZ and control groups in cortex	76

Fig.30	Concentration of monoamine (VMA, NE, DOPAC, 5-HT, 5-HIAA) of LWW, STZ and control groups in hippocampus.....	78
Fig.31	Concentration of monoamine (VMA, NE, DOPAC, 5-HT, 5-HIAA) of PCT, STZ and control groups in hippocampus.....	79
Fig.32	Concentration of monoamine (VMA, NE, DOPAC, 5-HT, 5-HIAA) of JPW, STZ and control groups in hippocampus.....	80
Fig.33	Concentration of monoamine (VMA, NE, DOPAC, 5-HT, 5-HIAA) of GPT, STZ and control groups in hippocampus	81
