

圖 8. 延胡索懸浮細胞母瓶

Figure 8. The cell suspension culture of *C. yanhusuo*. The suspension cell was cultured in a medium containing MS basic salts supplemented with 1.0 mg/L 2,4-D, 3% sucrose, pH5.2 and incubated under low light intensity ($10 \mu\text{E}/\text{m}^2\text{s}$) at orbital 80-100 rpm shaking speed.

圖 9. 利用 PCV 測定延胡索細胞懸浮培養

Figure 9. Packed cell volume (PCV) method for measuring cell growth of *C. yanhusuo*.
