

圖 25. 初體積對細胞懸浮培養生長之影響

Figure 25. Effect of initial volume on the growth of cell suspension of *C. yanhusuo*. Basal medium was MS salts supplemented with 3% sucrose, pH5.2, and incubated under low light intensity ($10 \mu\text{E}/\text{m}^2\text{s}$) at orbital 100 rpm shaking speed.

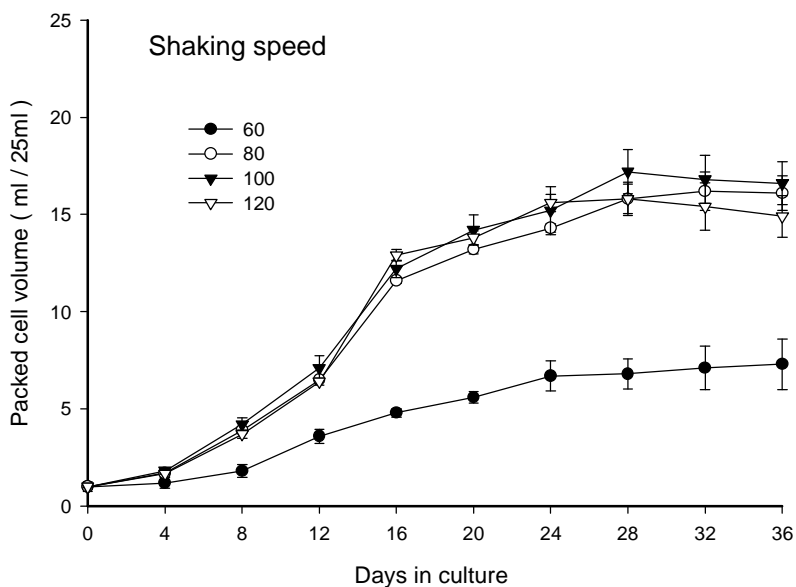

圖 26. 震盪速度對細胞懸浮培養生長之影響

Figure 26. Effect of shaking speed on the growth of cell suspension of *C. yanhusuo*. Basal medium was MS salts supplemented with 3% sucrose, pH5.2, initial PVC 1mL and incubated under low light intensity ($10 \mu\text{E}/\text{m}^2\text{s}$).
