Table 1-1.	The regression equations, concentration ranges and correlation coefficients of anthraquinones in rhubarb...	107
Table 1-2.	Intra-day and inter-day analytical precision and accuracy of aloe-emodin in methanol. ....	107
Table 1-3.	Intra-day and inter-day analytical precision and accuracy of rhein in methanol.....	108
Table 1-4.	Intra-day and inter-day analytical precision and accuracy of emodin in methanol.....	108
Table 1-5.	Intra-day and inter-day analytical precision and accuracy of chrysophanol in methanol.....	109
Table 1-6.	Recovery (%) of aloe-emodin from traditional decoction of Da Huang (n=3). ....	109
Table 1-7.	Recovery (%) of rhein from traditional decoction of Da Huang (n=3). ....	109
Table 1-8.	Recovery (%) of emodin from traditional decoction of Da Huang (n=3). ....	110
Table 1-9.	Recovery (%) of chrysophanol from traditional decoction of Da Huang (n=3). ....	110
Table 1-10.	Contents ( $\mu\text{g/g}$ ) of total aloe-emodin, rhein, emodin and chrysophanol in decoctions of rhubarb (R) and rhubarb steamed with wine (RSW), respectively.....	111

附表目錄

Table 1-11. Contents ( $\mu\text{g/g}$ ) of aloe-emodin, rhein, emodin and chrysophanol in decoctions of rhubarb (R) and rhubarb steamed with wine (RSW), respectively.....	111
Table 1-12. Contents ( $\mu\text{g/g}$ ) of glycosides of aloe-emodin, rhein, emodin and chrysophanol in decoctions of rhubarb (R) and rhubarb steamed with wine (RSW), respectively.....	111
Table 1-13. Contents ( $\mu\text{g/g}$ ) of aloe-emodin, rhein, emodin and chrysophanol in decoctions of rhubarb (R) and rhubarb steamed with wine (RSW).....	112
Table 1-14. Contents (%) of aloe-emodin, rhein, emodin and chrysophanol in decoctions of rhubarb (R) and rhubarb steamed with wine (RSW) .....	112
Table 2-1. The regression equations, concentration ranges and correlation coefficients of anthraquinones in rat serum.....	113
Table 2-2. Intra-day and inter-day analytical precision and accuracy of aloe-emodin in rat serum. ....	113
Table 2-3. Intra-day and inter-day analytical precision and accuracy of rhein in rat serum. ....	114
Table 2-4. Intra-day and inter-day analytical precision and accuracy of emodin in rat serum. ....	114
Table 2-5. Intra-day and inter-day analytical precision and accuracy of chrysophanol in rat serum. ....	115
Table2-6. Recovery (%) of aloe-emodin from rat serum (n=3).....	116

Table 2-7. Recovery (%) of rhein from rat serum (n=3).....	116
Table 2-8. Recovery (%) of emodin from rat serum (n=3).....	116
Table 2-9. Recovery (%) of chrysophanol from rat serum (n=3).....	116
Table 2-10. The serum concentrations (nmol/mL) of aloe-emodin sulfates in six rats after oral administration of decoction of rhubarb (5 g/kg). ....	117
Table 2-11. The serum concentrations (nmol/mL) of aloe-emodin glucuronides in six rats after oral administration of decoction of rhubarb (5 g/kg). ....	117
Table 2-12. The serum concentrations (nmol/mL) of rhein in six rats after oral administration of decoction of rhubarb (5 g/kg).....	118
Table 2-13. The serum concentrations (nmol/mL) of rhein sulfates in six rats after oral administration of decoction of rhubarb (5 g/kg). ....	118
Table 2-14. The serum concentrations (nmol/mL) of rhein glucuronides in six rats after oral administration of decoction of rhubarb (5 g/kg).....	118
Table 2-15 The serum concentrations (nmol/mL) of emodin sulfates in six rats after oral administration of decoction of rhubarb (5 g/kg). ....	119
Table 2-16. The serum concentrations (nmol/mL) of emodin glucuronides in six rats after oral administration of decoction of rhubarb (5 g/kg). ....	119

Table 2-17. The serum concentrations (nmol/mL) of chrysophanol sulfates in six rats after oral administration of decoction of rhubarb (5 g/kg). .....120

Table 2-18. The serum concentrations (nmol/mL) of chrysophanol glucuronides in six rats after oral administration of decoction of rhubarb (5 g/kg). ..... 120

Table 2-19. The serum concentrations (nmol/mL) of aloe-emodin sulfates in six rats after oral administration of decoction of rhubarb steamed with wine (5 g/kg). .....121

Table 2-20. The serum concentrations (nmol/mL) of aloe-emodin glucuronides in six rats after oral administration of decoction of rhubarb steamed with wine (5 g/kg). .....121

Table 2-21. The serum concentrations (nmol/mL) of rhein in six rats after oral administration of decoction of rhubarb steamed with wine (5 g/kg). .....122

Table 2-22. The serum concentrations (nmol/mL) of rhein sulfates in six rats after oral administration of decoction of rhubarb steamed with wine (5 g/kg). .....122

Table 2-23. The serum concentrations (nmol/mL) of rhein glucuronides in six rats after oral administration of decoction of rhubarb steamed with wine (5 g/kg). .....122

Table 2-24. The serum concentrations (nmol/mL) of emodin sulfates in six rats after oral administration of decoction of rhubarb steamed with wine (5 g/kg). .....123

Table 2-25. The serum concentrations (nmol/mL) of emodin glucuronides in six rats after oral administration of decoction of rhubarb steamed with wine (5 g/kg). .....	123
Table 2-26. The serum concentrations (nmol/mL) of chrysophanol sulfates in six rats after oral administration of decoction of rhubarb steamed with wine (5 g/kg). .....	124
Table 2-27. The serum concentrations (nmol/mL) of chrysophanol glucuronides in six rats after oral administration of decoction of rhubarb steamed with wine (5 g/kg). .....	124
Table 2-28. Pharmacokinetic parameters of aloe-emodin sulfates and glucuronides in serum after oral administrations of decoction of R and RSW and (5 g/kg) to six rats.....	125
Table 2-29. Pharmacokinetic parameters of rhein, rhein sulfates and glucuronides in serum after oral administrations of decoction of R and RSW (5 g/kg) to six rats.....	126
Table 2-30. Pharmacokinetic parameters of emodin sulfates and glucuronides in serum after oral administrations of decoction of R, RSW and (5 g/kg) to six rats.....	127
Table 2-31. Pharmacokinetic parameters of chrysophanol sulfates and glucuronides in serum after oral administrations of decoction of R, and RSW (5 g/kg) to six rats.....	128
Table 3-1. Intra-day and inter-day analytical precision and accuracy of emodin in rat serum. ....	129
Table 3-2. Recovery (%) of emodin from rat serum (n=3).....	129

Table 3-3. The serum concentrations (nmol/mL) of emodin sulfates in five rats after oral administration of emodin (50 mg/kg). .....	130
Table 3-4. Individual pharmacokinetic parameters of emodin sulfates in serum after oral administration of emodin (50 mg/kg) to five rats. ....	130
Table 3-5. The serum concentrations (nmol/mL) of emodin glucuronides in five rats after oral administration of emodin (50 mg/kg). ....	131
Table 3-6. Individual pharmacokinetic parameters of emodin glucuronides in serum after oral administration of emodin (50 mg/kg) to five rats. ....	131
Table 3-7. Comparison of pharmacokinetic parameters of emodin sulfates and glucuronides in serum after oral administration of emodin (50 mg/kg) to five rats. ....	132
Table 3-8. The serum concentrations (nmol/mL) of emodin in five rats after intravenous administration of emodin (10 mg/kg).....	133
Table 3-9. Individual pharmacokinetic parameters of emodin in serum after intravenous administration of emodin (10 mg/kg) to five rats. ....	133
Table 3-10. The serum concentrations (nmol/mL) of emodin sulfates in five rats after intravenous administration of emodin (10 mg/kg). ....	134

Table 3-11. Individual pharmacokinetic parameters of emodin sulfates in serum after intravenous administration of emodin (10 mg/kg) to five rats. ....	134
Table 3-12. The serum concentrations (nmol/mL) of emodin glucuronides in five rats after intravenous administration of emodin (10 mg/kg). ....	135
Table 3-13. Individual pharmacokinetic parameters of emodin glucuronides in serum after intravenous administration of emodin (10 mg/kg) to five rats. ....	135
Table 3-14. Comparison of pharmacokinetic parameters of emodin, emodin sulfates and emodin glucuronides in serum after intravenous administration of emodin (10 mg/kg) to five rats. ....	136
Table 3-15. Individual AUC <sub>0-720</sub> of emodin, emodin sulfates and glucuronides in serum after intravenous administration of emodin (10 mg/kg) to five rats. ....	136
Table 4-1. Contents ( $\mu\text{g/g}$ ) of anthraquinones in decoctions of Hu Zhang, and Da Huang. ....	137
Table 4-2. Cyclosporine blood concentrations (ng/mL) of five rats after oral administrations of cyclosporine (1.25 mg/kg) with tetraglycol/PEG400 (1:1) to five rats.....	138
Table 4-3. Cyclosporine blood concentrations (ng/mL) of six rats after oral coadministration of cyclosporine (1.25 mg/kg) with emodin (40 mg/kg). ....	138

Table 4-4. Comparison of pharmacokinetic parameters of cyclosporine in rats after oral administrations of cyclosporine alone (n=6) and coadministration with emodin (40 mg/kg) (n=5). .....	139
Table 4-5. Cyclosporine blood concentrations (ng/mL) of five rats after oral administration of cyclosporine (2.5 mg/kg) .....	140
Table 4-6. Cyclosporine blood concentrations (ng/mL) of five rats after oral administrations of cyclosporine (2.5 mg/kg) and traditional decoction of Da Huang (0.25 g/kg).....	140
Table 4-7. Pharmacokinetic parameters of cyclosporine in rats (n=5) after oral administrations of cyclosporine (2.5 mg/kg) alone and coadministration with decoction of Da Huang (0.25 g/kg).....	141
Table 4-8. Pharmacokinetic parameters of cyclosporine in rats (n=6) after oral administration of cyclosporine (2.5 mg/kg) alone and coadministration with decoction of Da Huang (0.25 g/kg). .....	141
Table 4-9. Cyclosporine blood concentrations (ng/mL) of six rats after oral administration of cyclosporine (2.5 mg/kg) .....	142
Table 4-10. Cyclosporine blood concentrations (ng/mL) of six rats after oral coadministration of cyclosporine (2.5 mg/kg) with decoction of Hu Zhang (2 g/kg).....	142
Table 4-11. Comparison of pharmacokinetic parameters of cyclosporine in rats (n=6) after oral administration of cyclosporine (2.5	

mg/kg) alone and coadministration with traditional decoction of Hu Zhang (2 g/kg).....143

Table 4-12. Cyclosporine blood concentrations (ng/mL) of seven rats after intravenous administration of cyclosporine (0.8 mg/kg) . .....144

Table 4-13. Cyclosporine blood concentrations (ng/mL) of seven rats after coadministration of cyclosporine (0.8 mg/kg, i.v.) and decoction of Da Huang (0.25 g/kg, p.o) .....145

Table 4-14. Comparison of pharmacokinetic parameters of cyclosporine in rats (n=7) after intravenous administration of cyclosporine (0.8 mg/kg) alone and oral coadministration with decoction of Da Huang (0.25 g/kg) ... .. 146

Table 5-1. Transport of rhodamine 123 (ng/mL) from serosal to mucosal side across the everted jejunum of rats (n=3, control)...147

Table 5-2. Transport of rhodamine 123 (ng/mL) from serosal to mucosal side across the everted jejunum of rats (n=3) in the presence of Da Huang decoction (1.25 mg/mL).....147

Table 5-3. Transport of rhodamine 123 (ng/mL) from serosal to mucosal side across the everted jejunum of rats (n=3) in the presence of Hu zhang decoction (10 mg/mL).....147

Table 5-4. Transport of rhodamine 123 (ng/mL) from serosal to mucosal side across the everted ileum of rats ( n=3, control) .....148.

Table 5-5. Transport of rhodamine 123 (ng/mL) from serosal to mucosal

side across the everted ileum of rats ( n=3 ) in the presence of  
Da Huang decoction (1.25 mg/mL).....148

Table 5-6. Transport of rhodamine 123 (ng/mL) from serosal to mucosal  
side across the everted ileum of rats ( n=3 ) in the presence of  
Hu Zhang decoction (10 mg/mL). ....148

Table 5-7. Transport of rhodamine 123 (ng/mL) from serosal to mucosal  
side across the everted jejunum of rats (n=3, control)....149

Table 5-8. Transport of rhodamine 123 (ng/mL) from serosal to mucosal  
side across the everted jejunum of rats (n=3) in the presence of  
emodin (0.2 mg/mL). ....149

Table 5-9. Transport of rhodamine 123 (ng/mL) from serosal to mucosal  
side across the everted ileum of rats (n=3, control).....150

Table 5-10. Transport of rhodamine 123 (ng/mL) from serosal to mucosal  
side across the everted ileum of rats (n=3) in the presence of  
emodin (0.2 mg/mL). ....150
