

表十四 Logistic regression 分析罹患乳癌的風險與 apoE 基因多型性的相關性

ApoE genotype ^a	B ^b	S.E. ^c	df	<i>p</i>	Exp (B) ^d
e3 (intercept)	-0.192	0.110	1	0.080	0.825
e2	0.395	0.240	1	0.099	1.485
e4	0.512	0.186	1	0.006	1.668

^aApoE 基因型分類成 e2 carrier (2/2, 2/3, 2/4) , e3 carrier (3/3) 及 e4 carrier (3/4, 4/4)。^bCoefficients of logistic regression.

^cStandard error of coefficients. ^dExponentials of coefficients.
