

表十六 Logistic regression 分析比較在 HER-2/neu status 與 apoE 基因多型性的相關性

ApoE genotype ^a	B ^b	S.E. ^c	df	<i>p</i>	Exp (B) ^d
e3 (intercept)	-0.444	0.220	1	0.043	0.642
e2	0.203	0.459	1	0.659	1.225
e4	-1.299	0.465	1	0.005	0.273

^a ApoE 基因型分類成 e2 carrier (2/2, 2/3, 2/4) , e3 carrier (3/3) 及 e4 carrier (3/4, 4/4)。^bCoefficients of logistic regression.
^cStandard error of coefficients. ^dExponentials of coefficients.
