

中國醫藥大學藥物化學研究所碩士論文

指導教授：徐素蘭 教授

共同指導教授：李珮端 教授

論 文 題 目

柳橙汁黃酮之代謝動力學

及大黃、黃芩對胺甲葉酸動力學之影響

Metabolic Pharmacokinetics of Flavonoids of Orange
Juice and the Effect of Rhei Rhizoma, Scutellariae
Radix on Methotrexate Pharmacokinetics

研究生 陳仁元

中國醫藥大學藥物化學研究所

目錄

附圖目錄.....	III
附表目錄.....	VI
中文摘要.....	XI
英文摘要.....	XIII
第一章 緒言.....	1
第二章 總論.....	4
第一節 橙皮苷及其苷元之結構與物化性質.....	4
第二節 橙皮苷及其苷元之藥理活性.....	6
第三節 大黃、黃芩之文獻考察.....	8
第四節 Methotrexate (MTX) 之特性.....	18
第五節 Multidrug resistance protein (MRP) 之特性.....	24
第三章 實驗之部.....	30
第一節 實驗材料.....	30
一、實驗試藥.....	30
二、儀器設備.....	31
三、實驗動物.....	33
四、溶液製備.....	33

第二節 實驗方法.....	35
一、橙皮苷元於大白鼠體內之代謝動力學.....	35
二、橙皮苷於大白鼠體內之代謝動力學.....	40
三、柳橙汁黃酮於人體之尿藥代謝動力學.....	41
四、大黃、黃芩水煎劑於鼠體對 MTX 動力學之影響.....	48
第四章 結果與討論.....	54
一、橙皮苷元於大白鼠體內之代謝動力學.....	54
二、橙皮苷於大白鼠體內之代謝動力學.....	58
三、柳橙汁黃酮於人體之尿藥代謝動力學.....	59
四、大黃、黃芩水煎劑於鼠體對 MTX 動力學之影響.....	64
參考文獻.....	116
附錄.....	131

附圖目錄

- Fig. 1-1** Chromatograms of hesperetin and internal standard in rat serum. (a): blank serum, (b): serum spiked with hesperetin (3.2 $\mu\text{g/mL}$) and the internal standard, (c): a serum sample treated with glucuronidase, (d): a serum sample treated with sulfatase. H: hesperetin, IS: 5,7-dimethoxycoumarin.....73
- Fig. 1-2** (a): Mean (\pm S.E.) serum concentration-time profiles of hesperetin (\bullet), hesperetin sulfates (\circ) and hesperetin glucuronides (\blacktriangledown) after intravenous administration of hesperetin (10.0 mg/kg) to six rats (b): the semi-log diagram of (a).....74
- Fig. 1-3** Mean (\pm S.E.) serum concentration-time profiles of hesperetin sulfates (\bullet) and hesperetin glucuronides (\circ) after oral administration of hesperetin (50.0 mg/kg) to six rats.....75
- Fig. 3-1** Chromatogram of hesperidin, narirutin and internal standard in orange juice. H: hesperidin, N: narirutin, IS: 6,7-dimethoxycoumarin.....76
- Fig. 3-2** Chromatograms of hesperetin, naringenin and the internal standard in human urine. (a): blank urine, (b): urine spiked with hesperetin (10.0 $\mu\text{g/mL}$), naringenin and internal standard, (c): an urine sample hydrolyzed with glucuronidase, (d): an urine sample hydrolyzed with sulfatase. H: hesperetin, N: naringenin, IS: 5,7-dimethoxycoumarin.....77
- Fig. 3-3** Cumulated urinary excretion of (a): hesperetin sulfates and (b):

hesperetin glucuronides after oral administration of orange juice to eleven volunteers.....	78
Fig. 3-4 Cumulated urinary excretion of (a): naringenin sulfates and (b): naringenin glucuronides after oral administration of orange juice to eleven volunteers.....	79
Fig. 3-5 Individual cumulated urinary recoveries (% of dose) of hesperetin in eleven volunteers after oral administration of orange juice.....	80
Fig. 3-6 Individual cumulated urinary recoveries (% of dose) of naringenin in eleven volunteers after oral administration of orange juice.....	82
Fig. 3-7 Cumulated urinary recoveries (% of dose) of hesperetin sulfates and glucuronides in eleven volunteers after oral administration of orange juice.....	84
Fig. 3-8 Cumulated urinary recoveries (% of dose) of naringenin sulfates and glucuronides in eleven volunteers after oral administration of orange juice.....	85
Fig. 3-9 Mean (\pm S.E.) urinary recovery (% dose /h) of sulfatase and glucuronidase of (a): hesperetin and (b): naringenin in each time interval after administration of orange juice to eleven volunteers.....	86
Fig. 4-1 Mean (\pm S.E.) serum concentration-time profiles of methotrexate after oral methotrexate alone (\bullet) and coadministration with 2.0 g/kg (\circ), and 1.0 g/kg (\blacktriangledown) of Rhei Rhizoma decoction (n=8).....	87

Fig. 4-2 (a) Mean (\pm S.E.) serum concentration-time profiles of methotrexate after intravenous methotrexate alone (●) and coadministration with Rhei Rhizoma decoction 2.0 g/kg (○) and (b): the semi-log diagram of (a) (n=8).....88

Fig. 4-3 Mean (\pm S.E.) serum concentration-time profiles of methotrexate after oral methotrexate alone (●) and coadministration with 2.0 g/kg (○), 1.0 g/kg (▼) of Scutellariae Radix decoction (n=8).....89

Fig. 4-4 (a) Mean (\pm S.E.) serum concentration-time profiles of methotrexate after intravenous methotrexate alone (●) and coadministration with 2.0 g/kg of Scutellariae Radix decoction (○) and (b): the semi-log diagram of (a) (n=8).....90
