Good morning, Ladies and Gentlemen :

First of all, I would like to thank you for coming. It's my pleasure to have this opportunity to be talking to you about my future plans.

As you know, I am 18 years old. Maybe You will think I am too young, and that it is not important for me to plan my future.

But we all know, like young birds, we are soon to leave our nests, and fly alone.

In this world of change and uncertainty, there's nothing to depend on. No one can be by our side always throughout our lives "Never depend upon anyone but yourself."

I am growing up so I think it is very important for me to plan my own future.

Luckily, I was born in a Christian family.

My father and mother love me very much. During these 18 years, they have taken care of me, I have been loved deeply by everyone, so there is no sense of "hatred" in my heart. My heart is full of love and happiness.

Since I am a Christian, I realize the love of our Heavenly father is the Greatest love of all. I would like to be a preacher, an instrument of God so that I can bring His message to others, where there is hatred, I will sow love. Where there is doubt, light. Where there is despair, hope. In short, I will sow faith, hope, and love. I will go to countries and cities, to tell people that Jesus Christ is the Way, the Truth and the Life.

All love is Sacrifice, I have a zest for life. I love this world and the people there in, so I shall devote myself to the whole world.

As I am so young, and there's so many things for me to learn, to feel. I will learn them day and night, and try to drink always from the fountain of knowledge. Knowledge itself is power so I will never be afraid to learn. After having trained myself well, I will pray "Oh! Lord, teach me thy way." I don't worry about the future, for I remember and follow Jesus. I'll walk beside Him. He knows what is ahead, and I know about that. By following Him faithfully and will not be led astray.

Thank You

Ladies and Gentlemen :

Today, my Subject is "My Future Plan."

As we know in this civilized world, we have every right to plan our future, and we also have some obligations. Because without a plan, one may easily be led away from the path or course of his future career.

Some people plan to be doctors, scientists, while others plan to be workers. In this world of today, I think there is no difference existing between them since "Occupation is a holy undertaking."

Just like most of the people I have my own plan, that is, to be a public officer- in the field of the Public Health. I always laugh at myself for this plan. When I was a child I planned to be a president of some organizations because there were many prominent people whose portraits swam around in my head. I envied them, yet I respected them, so I wanted to become one of them. Many years ago I planed to be a muscian, for at that time, I took much interest in music, But now I plan to be a public officer. It seems that the older we are the smaller the plan we have. As a matter of fact, I should not say it is so small a plan to be a member in the field of Public Health.

Many of us may have the same thought, for Public Health is growing more important these days. Especially in Taiwan, the growth of population, and the development of industry have brought us with no less problems. For instance, the lack of food, the pollution of air and water, and the transmission of diseases and so on. How to overcome these problems depends on every one of us, for we are the leaders of tomorrow. So to be a member of the Public Heath field is a big plan in itself, by no means a small one. Many of you came into this school with discouragement, and perhaps even disappointment, but try to think it over. If you study hard, you will find out that there is no difference whether you study in this school or in others. So, I always remind myself that "nothing more to think about, just study hard" and do my best to make my plan come true.
