

Ref.: Ms. No. JOT-2011-17475R1

Electrical stimulation improves peripheral nerve regeneration in streptozotocin-induced diabetic rats

The Journal of Trauma, Injury, Infection and Critical Care

Dear Dr Chen:

Your manuscript has now been reviewed by the editorial consultants of the JOURNAL OF TRAUMA, and we are pleased to inform you that it has been accepted for publication.

Please note that we must have signed Copyright Assignment and Financial Disclosure forms from each author associated with this paper before your manuscript can be published in the JOURNAL OF TRAUMA.

IF YOU HAVE ALREADY SUBMITTED THESE FORMS PLEASE DISREGARD THIS REQUEST. If you have incomplete or missing forms, your manuscript will not be published until all signed forms have been received at our editorial office.

To access these forms, please visit our HOME PAGE at www.editorialmanager.com/jt. The links to these forms are located below the LOGIN button and beneath the FILES & RESOURCES heading. Please download, complete, sign, and forward these required forms to us at your earliest convenience. You may fax the forms to 210-342-2966 or email them to jtrauma@uthscsa.edu.

You will receive page proofs approximately one month prior to publication. To expedite publication, it is essential that you review those proofs within 48 hours and return them to LIPPINCOTT WILLIAMS & WILKINS, our publisher, via email, fax, or courier.

Sincerely,

Dr. Basil A. Pruitt, Jr.

Editor

The Journal of Trauma, Injury, Infection and Critical Care
