Clinical trial

(Peripheral blood stem cell transplantation)

Subcutaneous G-CSF injection combined with intracerebral mobilized peripheral blood hematopoietic stem cells (CD34⁺) transplantation—human clinical trial in chronic stroke:

Inclusion criteria:

- 1) Subjects with cerebral ischemia at middle cerebral artery territory producing a serious measurable deficit by NIHSS scale and who could receive study medication within 6 to 60 months after the onset of the symptom. A serious measurable deficit by NIHSS is defined as the NIHSS ≥ 9 and ≤ 20
- 2) Subjects must be ≥ 35 and ≤ 75 years old, of either sex
- 3) Subjects or his / her legal guardians must demonstrate their willingness to participate in the study and comply with its procedures by signing a written informed consent.
- 4) Subjects with Modified Rankin Scale ≥ 1

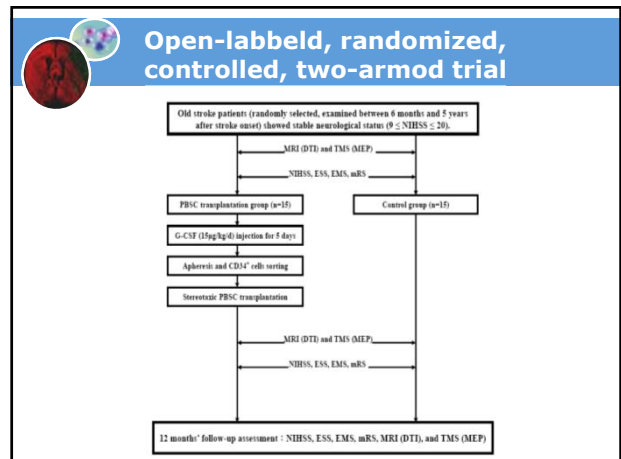

7 old stroke patients were transplanted in phase I trials

Table 1. Characteristics of patients in G-CSF+PBSC-treated group

Characteristics	Patient 1	Patient 2	Patient 3	Patient 4	Patient 5	Patient 6	Patient 7
a.SS	Lt hemiparesis	Rt hemiparesis & aphasia	Rt hemiparesis & aphasia	Lt hemiparesis	Lt hemiparesis	Lt hemiparesis	Lt hemiparesis
b. Infarct area on T2WI							
c. CD34+ cells on T2*							
d. Stroke history	3 y	5 y	1.5 y	2 y	3 y	1.5 y	0.6 y
e. No. of injected CD34+ cells	5 x 10 ⁶	7 x 10 ⁶	6.7 x 10 ⁶	8 x 10 ⁶	3 x 10 ⁶	7.5 x 10 ⁶	6.5 x 10 ⁶
f. Purity of CD34+ cells	97%	77%	49%	84.5%	33%	90%	96%
g. No. of IC trajectory	4	4	4	3	3	3	3

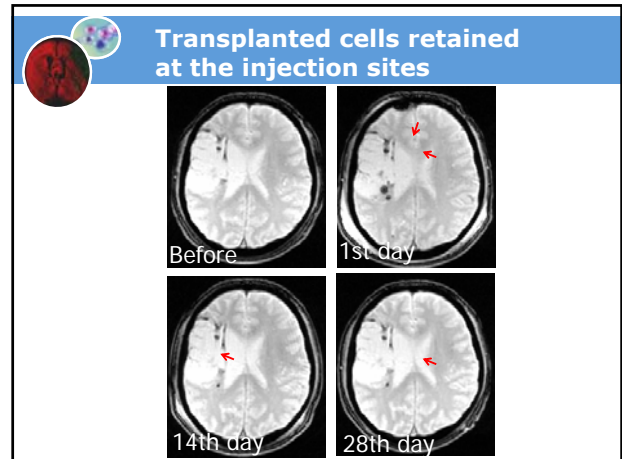

SS=symptoms and signs, T2WI=T2 weighted image in MRI, No.=numbers, Lt=left limbs, R=right limbs, WBC=white blood cells, y=years, IC=intracerebral

Clinical trial data

characteristics	PBSCs	Control	p
	Group (n=15)	Group (n=15)	
Age (years)	50.1 ± 8.7 (35-64)	56.7 ± 6.5 (41-66)	0.02
Men/Female	12/3	8/7	0.25
Duration of stroke (years)	2.7 ± 1.4 (0.6-5)	2.5 ± 1.4 (0.6-5)	0.67
Concomitant diseases:			
Hypertension	11 (73%)	8 (53%)	0.25
Diabetes	6 (40%)	2(13%)	0.22
Hyperlipidemia	3 (20%)	5 (33%)	0.68
Smoking	6 (40%)	1 (7%)	0.08
Prior aspirin or antiplatelet use	15 (100%)	15 (100%)	0.99
Rehabilitation duration (hours/week)	10.1 ± 2.1	11.5 ± 1.6	0.58
Baseline scores:			
Modified Rankin scale	2.9 ± 0.3	2.7 ± 0.4	0.91
NIH stroke scale	9.3 ± 0.5	9.6 ± 1.3	0.93

 April 12-14, 2014
 The Splendor Hotel Taichung / 台中金典酒店禮堂

Important Dates

- Deadline of Early-Bird Registration:** Monday, March 30, 2014
- Deadline of Abstract Submission:** Friday, February 28, 2014
- Announcement of Accepted Abstracts:** Friday, March 7, 2014
- Deadline for Pre-Registration:** Saturday, March 22, 2014

Keynote Speakers

- Eva Feldman** (U.S.A.)
 Professor, Department of Neurology, University of Michigan Medical School, Ann Arbor, MI, USA
 Topic: Intraspinal Stem Cell Transplantation in ALS: a New Horizon
- Melissa Helen Little** (Australia)
 NHMRC Senior Principal Research Fellow, Institute for Molecular Bioscience, The University of Queensland, St. Lucia, Brisbane, Australia
 Topic: Regenerating The Kidney from Stem Cells
- Kai Liu** (Hong Kong)
 Assistant Professor, Division of Life Science, The Hong Kong University of Science and Technology, Hong Kong
 Topic: Intrinsic Mechanisms Regulating Adult Axonal Regeneration
- Hideki Taniguchi** (Japan)
 Professor, Department of Regenerative Medicine, Yokohama City University, Japan
 Topic: Vascularized and Functional Human Liver Tissue from an Induced Pluripotent Stem Cell-Derived Organ Bud Transplant

Main Topic

- Advancing Translational and Regenerative Medicine in Stem Cells Therapy
- Current Clinical Applications of IPS Cell
- Nanotechnology and Medical Devices
- New Drug Discovery and Development
- Patent Valuation and Patent Approvals

Organizing Committees

- 中華醫學會血液及骨髓科學會
- 台灣血液再生醫學學會
- 中華醫學會血液病學會
- 臺灣神經外科醫學會
- 台灣醫學會
- 臺灣外科醫學會
- 藥品優良臨床試驗規範 Good Clinical Practice (GCP)
- 中華醫學會醫學會主辦聯合會
- 臺灣神經學會
- 臺灣外科醫學會
